HORSE FEED	DESCRIPTION	GENERAL FEEDING GUIDELINES (kgs/day)			
		Activity Level	Body Weight		
			300-400kg	400-500kg	500-600kg
FFM 25% Horse Supplement (Pellets)	Designed to be fed at a low feeding rate to meet all the vitamin and mineral requirements of your horse. Ideal for easy keepers. Can also be mixed with whole grains.	Maintenance	0.25	0.5	0.75
		Light	0.5	0.75	1.0
		Moderate	0.75	1.0	1.25
		Intense	1.0	1.25	1.5
FFM 12% Horse Ration (Pellets)	Nutritionally balanced ration in a pellet form. Improves body condition, appearance and provides the necessary energy and nutrients for working horses.	Maintenance	0.5-1	1-2	2-3
		Light	1-2	2-3	3-4
		Moderate	2-3	3-4	4-5
		Intense	3-4	4-5	5-6
FFM 13% Hi Fat-Hi Fibre Horse Ration (Pellets)	This ration provides energy primarily from high quality fat and fibre ingredients. Ideal for weight gain or for performance horses who get 'hot' on high grain diets.	Maintenance	1-2	2-3	3-4
		Light	2-3	3-4	4-5
		Moderate	3-4	4-5	5-6
		Intense	4-5	5-6	6-7
Sweet 13% Horse Ration (Texturized)	A high quality sweet feed with high grain content and tasty molasses provides a feed your horses will love! This ration provides a high energy diet great for performance horses.	Maintenance	0.5-1	1-2	2-3
		Light	1-2	2-3	3-4
		Moderate	2-3	3-4	4-5
		Intense	3-4	4-5	5-6
Sweet 14% Senior Horse Ration (Texturized)	A high quality sweet feed with high fat and fiber levels formulated to meet the needs of mature horses.	Maintenance	1-2	2-3	3-4
		Light	2-3	3-4	4-5
		Moderate	3-4	4-5	5-6
		Intense	4-5	5-6	6-7
FFM 16% Horse Ration (Pellets)	A complete feed formulated with higher protein and fat makes this feed ideal for growing horses, gestating/lactating mares, breeding stallions and performance horses.	Maintenance	0.5-1	1-2	2-3
		Light	1-2	2-3	3-4
		Moderate	2-3	3-4	4-5
		Intense	3-4	4-5	5-6
FFM 18% Foal Ration (Pellets)	Designed for nursing foals and weanlings up to a year of age to promote healthy foals with steady growth and development.	Nursing Foal	Feed as a creep feed at ~1% of body weight		
		Weanling	Feed ~ 1kg ration/100kg of body weight.		

Note: In addition to FFM horse feeds, all horses should receive a minimum of 1% of their bodyweight in good quality hay or pasture. Animals should be monitored for body condition score and adjustments made accordingly. Provide free choice salt and fresh clean water. For more specific feeding guidelines please contact us directly.
